PROFESSIONAL SUMMARY

Full Stack Developer with 3 years of freelance experience building responsive web applications and business websites. Experienced in React.js, JavaScript, Node.js, Express.js, MongoDB, REST APIs, Socket.IO, Tailwind CSS, GSAP, Git/GitHub, and deployment with Netlify and Render. Developed full-stack applications featuring authentication, CRUD operations, database persistence, real-time communication, API integration, responsive UI, and interactive frontend experiences. CEHv12 training provides a security-conscious approach to web application development.

EXPERIENCE

Freelance Full Stack / Frontend Developer — Independent / Local Business Clients 2023 - Present

Develop responsive web applications and websites for local business clients, translating requirements into functional interfaces and production-ready pages. Build reusable React components, responsive layouts, interactive UI elements, and API integrations. Use Git/GitHub for version control and deploy completed projects to web hosting platforms. Work directly with clients to understand requirements, implement revisions, troubleshoot frontend issues, and deliver polished user experiences.

PROJECTS

Uber Clone — Full-Stack Ride Booking Application

GitHub: github.com/thafshan/uberClone | Live: uber-clone-afshan.netlify.app

Built an Uber-inspired ride booking platform with separate user and captain workflows. Implemented user registration and login, JWT-based authentication, pickup and destination selection, fare estimation, ride requests, captain ride acceptance, ride status management, real-time updates, live location tracking, ride history, and captain earnings. Developed REST APIs with Express.js, MongoDB data models with Mongoose, Socket.IO real-time communication, responsive React interfaces, and animated interactions.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Mongoose, Socket.IO, JWT, bcrypt, Tailwind CSS, GSAP, Axios, React Router, Google Maps API

MERN To-Do List — Full-Stack Task Management Application

GitHub: github.com/thafshan/MERN-To-Do-List | Live: mern-to-do-list-r6iu.onrender.com

Developed a full-stack task management application using the MERN stack. Implemented complete CRUD operations for creating, viewing, editing, completing, and deleting tasks. Connected the React frontend to an Express.js REST API using Axios and persisted task data in MongoDB through Mongoose. Built a responsive interface with reusable components and Tailwind CSS, and deployed the application online.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Mongoose, Axios, REST API, Tailwind CSS, Vite

GTA VI Landing Page — Interactive React Frontend

GitHub: github.com/thafshan/GTAVI | Live: gtavithafshan.netlify.app

Created an interactive GTA VI-inspired landing page focused on responsive design, immersive visual presentation, reusable React components, and smooth animation. Implemented modern layouts, animated transitions, interactive sections, and responsive behavior across screen sizes. Used GSAP for animation and Tailwind CSS for rapid, consistent UI development.

Tech Stack: React.js, JavaScript, Tailwind CSS, GSAP, Vite, HTML5, CSS3

TECHNICAL SKILLS

Languages & Web	JavaScript (ES6+), HTML5, CSS3
Frontend	React.js, React Router, Tailwind CSS, GSAP, Vite, Responsive Design
Backend	Node.js, Express.js, REST APIs, Socket.IO
Database & Authentication	MongoDB, Mongoose, JWT, bcrypt
Tools & Deployment	Git, GitHub, Axios, Netlify, Render, Google Maps API
Security	Ethical Hacking, Penetration Testing Fundamentals, Networking, CEHv12

EDUCATION

Bachelor of Computer Applications (BCA) — Amity University, Noida

2023 - 2026

Relevant Areas: Web Development, Database Management, Computer Networks, Cybersecurity, Cloud Computing

CERTIFICATIONS

Certified Ethical Hacker (CEH) - Ethical Hacking & Countermeasures | HackerRank - React JS (Basic) | HackerRank - CSS (Basic)

ADDITIONAL

Languages: English, Hindi | Soft Skills: Problem-solving, Communication, Time Management, Collaboration, Adaptability
